

Gymmies

A product pitch by Adrians Marte Garcia

The Problem

What problem does your product website solve or address?

Did you ever felt like going to the gym but didn't have the motivation or someone to go with you? Maybe you didn't go because you didn't have a goal or didn't know how to start or what exercises to do, or what days to go or a what time?

Your Solution

What is your product idea, and how does your website help solve the problem?

Well Gymmies, is the solution for you, it is design to help you start your fitness life. By pairing you up with people near you that also need a partner or motivation to start. Gymmies provides you, with motivations, gives you daily routines based on your weight, height, availability and your desire body.

Website Type

What type of website are you building?

Brochure

Software Development Process

What software development process will you use?

I will use Waterfall, I feel this the best fit for my project goals and timeline because it's easy to follow the steps and you can easily set a timeline for each step

Target Audience

Who is the site for?

It's design for people that wants to workout but don't have a partner or the motivation to start. It can be useful for students, young adults, and anyone that wants to have a healthier life

Name: Marcus

Gender: Male

Age: 20

Location: Providence, Rhode Island

Pitch Summary

Gymmies is needed because many people want to work out but have trouble finding a workout partner or staying motivated. The website makes it easier to find someone with similar fitness goals, schedules, and workout interests. It can help people stay motivated and make working out more fun. Now is a good time for Gymmies because people are using websites and apps more to stay healthy, connect with others, and build communities. Gymmies uses technology to make finding a workout partner simple and convenient.

Feedback Questions

Include any specific areas where you'd like peer or instructor feedback.

I would like feedback on whether the idea for Gymmies is clear and easy to understand. I would also like to know if the website has too many or too few features. Finally, I would like feedback on whether the target audience is clearly defined and if the website would be useful for them.
